

Standard equipment:

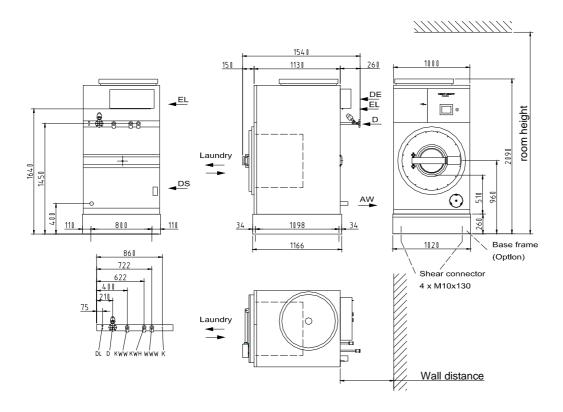

- Steam heating, direct, 3 13 bar with air-operated steam valve; <u>alternative:</u> electric heating with 27 kW connected load
- Frequency-controlled drive with infinitely variable drum speed for wash and extraction
- Electronic control with touch screen
- 3 removable flush-in hoppers for liquid and powdery detergents
- 1 connection point and up to 8 control facilities for dosing pumps
- Waste water valve
- Water connections for 1, 2 or 3 kinds of water
- Colour: S+K blue
- Operational data collection with interface to external data processing system

Optional Equipments:

- Steam heating, indirect,
 3 13 bar with air-operated steam valve,
 without condensate trap
- Oil circulating heating up to 5 bar, with air-operated valve
- Water recovery tank
- Waste water pump with filter for foreign objects
- Base frame, 26 cm high
- Liquor re-circulation system for WetClean or short liquor processes
- 4 additional connection points for dosing pumps
- Connection to an external water recovery system
- PNEUMA-LOAD-System for automatic loading and barrier separation
- Software for programming and changing of washing programmes at customers PC
- Other options on request
